

**Law Enforcement Software Solutions Becomes a “Front Runner” With the Release of Its Firearms Instruction and Range Management Solution, FIRM™**

South Pasadena, California — April 1, 2006 — Law Enforcement Software Solutions today announced it will launch a new application using Microsoft SQL Server 2005, earning the company Front Runner status from Microsoft Corp. Firearms Instruction/Range Management (FIRM™) in combination with Microsoft SQL Server 2005 helps enable customers to automate the process of recording, searching, analyzing and archiving firearms training records coupled with tracking equipment maintenance and related inventory. SQL Server 2005 is the next-generation data management and analysis software that will deliver increased scalability, availability and security to enterprise data and analytical applications while making them easier to create, deploy and manage.

“Microsoft has always been committed to the success of our broad ISV partner community and will continue to rely heavily on that community to drive innovative solutions to market,” said Pradeep Rathinam, general manager of U.S. ISV Strategy in the U.S. Partner Group at Microsoft. “The Front Runner program was designed to provide our partners with the best development environment possible and give them the technical and marketing tools they need to be successful over the long term.”

Microsoft wanted to ensure that ISVs had access to a full host of benefits to enable them to bring best-of-breed solutions to market more quickly and effectively. Giving ISVs the resources they need to fast-track the development of these applications enables customers to start taking advantage of the increased scalability, availability and security of the application built on top of SQL Server 2005 almost immediately, increasing their company’s productivity.

“Law Enforcement Software Solutions is excited to support SQL Server 2005 because it’s a great platform and a great leap forward,” said Tony Abdalla, Chief Executive Officer of Law Enforcement Software Solutions. “Achieving Front Runner status enables us to deliver applications to customers within the same timeframe as the launch of SQL Server 2005. As a result of the solution we have developed, we are uniquely positioned to help our customers get the most from their technology investment.”

FIRM™ automates critical processes such as the recording, searching and archiving of firearms training records along with tracking equipment maintenance and related inventory. FIRM™ is the most comprehensive firearms training solution on the market today that will enable law enforcement agencies to benefit from increases in accuracy, efficiency and button click access to their information.

### **About Law Enforcement Software Solutions**

Law Enforcement Software Solutions is a leading provider of comprehensive, off-the-shelf software solutions specifically tailored to the law enforcement community. Under an experienced management team with over 40 years of law enforcement experience, the company has focused on delivering quality solutions in the areas of training management, use-of-force tracking and inventory/asset management at a reasonable price.
